

NEED BACKUP? WE GOT YOU COVERED

SAAS BACKUP

Small and medium-sized businesses rely heavily on online software services for email, project management, and storing files in the cloud. As they use these online tools, they encounter new challenges that require better online security.

However, major service providers like Microsoft 365, Google Workspace, or Salesforce don't offer full data backup, leaving businesses at risk of losing valuable data to attacks from hackers.

Cloud Backup for Peace of Mind

Experience worry-free data backup with our cloud solution. It's easy to set up and requires minimal attention—freeing up your time to focus on running and growing your business.

Streamline Your IT Tools

Access all your essential software in one convenient tool. Seamlessly manage Microsoft 365 (OneDrive, SharePoint, Teams), Google Workspace, Salesforce, and more.

Quicker Searches for Increased Productivity

Get the most out of smart search tools that help identify missing data in minutes. Easily find previews to verify data during the restore process. Perfect for SMBs!

Protect Your Data in The Cloud

With our service, your data is automatically backed up to a safe place in the cloud. Even if your software goes down, your data stays safe and easy to access.

Setup and Recovery Made Simple

Setting up our service is as easy as 1-2-3. After activating, you can sit back and relax. If you need to recover emails, files, or other information, it's just a few clicks away.

Daily Backup Assurance

We guarantee at least one backup every day and typically run four to six backups, ensuring your data is always up to date.

Flexible Data Retention

Keep backup data for as long as you need, from just a month to several years. You can even customize retention based on the type of data (like emails or files). It's entirely up to you!

Find and Restore Easily

Our unique preview feature lets you confirm you've got the right file or email before you restore it. Search across all data to find specific backups quickly, without loading multiple versions.

Easy-to-Understand Dashboards

With our dashboards, you can easily analyze your key data. You can also set custom retention periods for different types of data.
